

Smarter air, from anywhere

Controls made easy

Simplicity of an app.

airCloud Home is a user-friendly interface that lets you control your air conditioner directly from your smartphone.

**NEW
2021
FEATURES**

Key Features

Available now with **airCloud Home** version 3.0

Smart-Fence

Automatic operation of your air conditioner based on your location

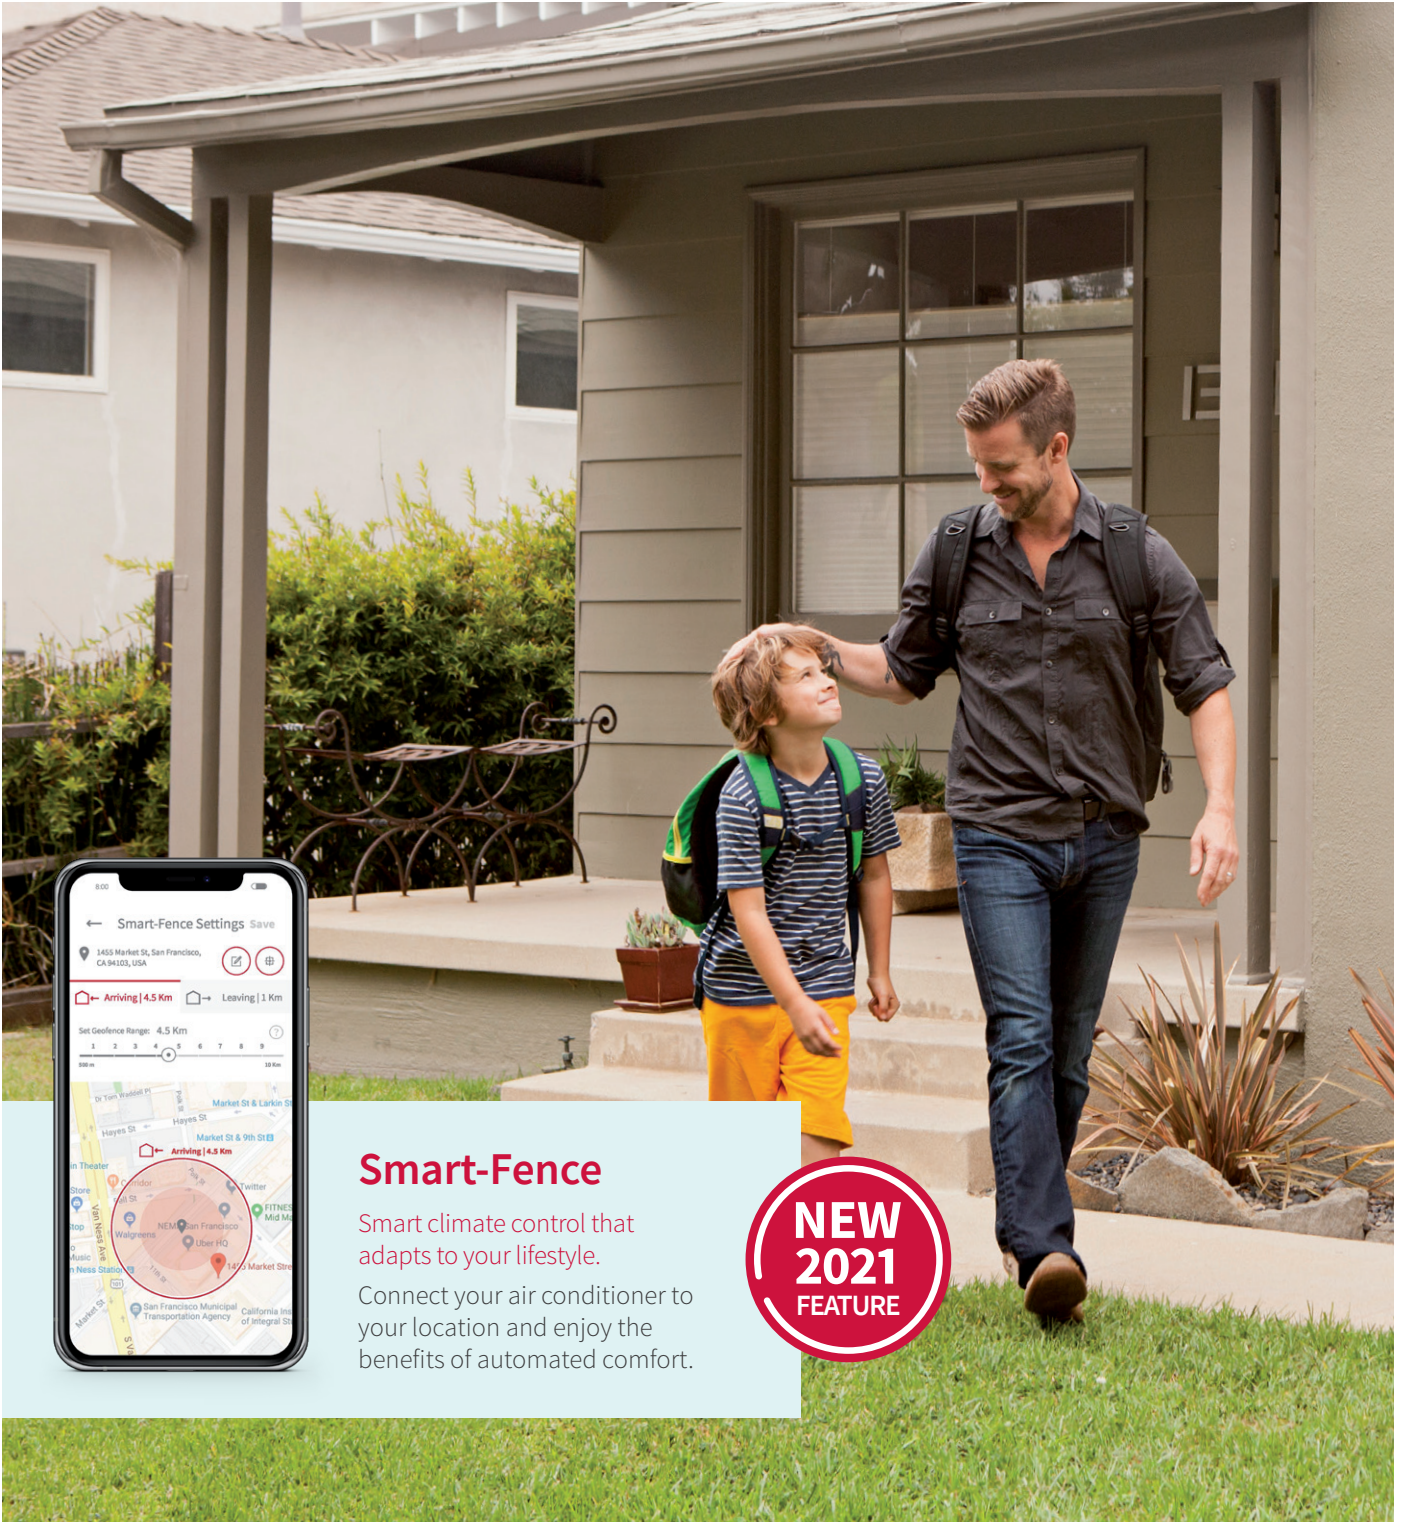

Multi-User

Up to 20 users per airCloud Home module

Voice control

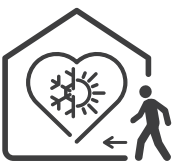

Connect with your smart speaker and set your indoor climate via voice control.

Smart-Fence

Smart climate control that adapts to your lifestyle.

Connect your air conditioner to your location and enjoy the benefits of automated comfort.

As you arrive home

Your air conditioner will automatically turn on, helping to create a comfortable and welcoming indoor climate.

As you leave home

Your air conditioner will stop automatically or switch to a more economic preset temperature for optimal energy efficiency.

Enabling Smart-Fence

1. Set your Smart-Fence perimeter from 500m to 10km around your house.
2. Select your preferred behaviour as you leave or enter your Smart-Fence perimeter.
3. Enjoy smarter air, from anywhere. Smart-Fence activation notifications will be sent to your phone and other pre-defined users' automatically.
4. Adjust the temperature or reset Smart-Fence any time from your airCloud Home app.

Command with your voice

Connect with your smart speaker.

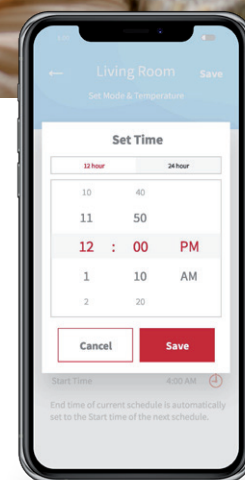

airCloud Home is fully-compatible with Amazon Alexa and Google Assistant, enabling you to change the temperature hands-free while you cook, clean, or exercise.

Plan to save energy

Intuitive scheduling options work around your needs:

- Set the simple timer before bed and save energy while you sleep
- Use the weekly timer to schedule operation around your daily routine.

airCloud Home is designed for **your convenience**

Register in a few simple steps

It's easy to get started with airCloud Home.

Simply create your account online and configure your air conditioner with ease.

Unlimited connections

Access to an unlimited number of properties and manage all of your Hitachi air conditioners from the app without restriction.

FrostWash activation

With airCloud Home, you can activate the Hitachi exclusive self-cleaning function while you're away, and contribute to preserving your indoor air quality.

Shared access with your family

airCloud Home allows you to provide access for up to 20 people.

You can choose to restrict access for certain functions

Easy to troubleshoot

In the event of a system malfunction, an error code will display on screen, which you can reference when contacting your service provider through the app.

Data security

Your security is our top priority. With high security standards, only a minimal amount of personal data is required to set up your account.

How airCloud Home works

Connect your air conditioner to the cloud, via your home wireless network.

airCloud Adapter Discreet and easy to install

- airCloud Adapter² is placed underneath your indoor unit
- Installation process is simple. Pair the app with your air conditioner(s) using a QR code
- No additional power source is required
- Small discreet unit: 80mm (L) x 40mm (D) x 16.5mm (H) @ 80g

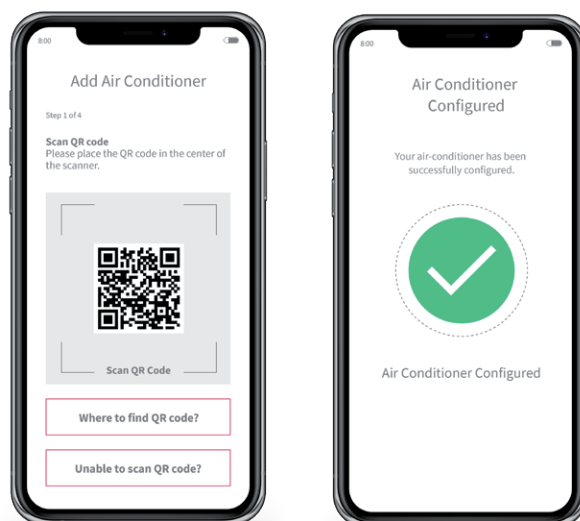

¹ Compatibility of air conditioner model with airCloud Home shall be confirmed with your Hitachi Cooling & Heating representative.

² airCloud Home Adapter SPX-WFG02 is available as an optional accessory.

Simple QR scan and setup to start your airCloud Home journey

To connect to your Hitachi air conditioner, simply scan the QR code on your indoor unit.

This will enable you to pair and configure your app to your air conditioner in an instant.
